

MPhil-PhD Programme in Biomedical Sciences

Division of Biomedical Sciences
The Chinese University of Hong Kong

OUR MISSION

Is to train world research leaders, university professors, senior laboratory managers and experts in professions leading to advances in biomedical sciences.

OUR GOAL

Is to equip postgraduate students with in-depth theoretical knowledge and advanced research skills to facilitate their intellectual development and enhance their growth as future scientists in biomedical sciences.

OUR PROGRAMME

Provides a range of theme-based research topics across different disciplines for selection by the students based on their research interests.

- Cancer Biology and Experimental Therapeutics
- Developmental and Regenerative Biology
- Neural, Vascular and Metabolic Biology
