Biological Annotators

Our team at Max Planck Institute of Neurobiology is looking for students!

You will work with 3D image data of the brain to annotate structures that are relevant in neural circuits.

Requirements

Student of Biology, Neuroscience or similar

Familiarity with one or more:

- Biology of neurons
- Electron microscopy data

Application

Flexible working hours (40h–80h/month) and the possibility to work from home.

If you are interested, send us your CV and a short cover letter to
